MODULE 2: Daily Health Tracking System

🎯 **Purpose**

- Track **daily health condition**
- Detect **early warning signals**
- Help doctors see **real lifestyle + symptom history**

👉 Think of it as:

"Daily health diary + AI early detection engine"

COMPLETE FLOW

🟢 **Step 1: Daily Health Check (Very Simple UI)**

Every day user MUST answer:

🤒 **Symptoms**

- "Any symptoms today?"
    - Yes → select (fever, headache, stomach pain, etc.)
    - No → "All good today ✅"

👉 Keep it **1-tap input**, not complicated

🍽️ **Lifestyle Input (Important for doctors)**

- What did you eat today?
    - Normal home food
    - Outside food 🍕
    - Junk / oily 🍟

📝 **Optional Inputs**

- Stress level 😓
- Energy level ⚡
- Sleep quality 😴

Step 2 : upload reports , Prescription and medicines.

When user opens module first time:

Ask:

👉 "Do you have any recent reports or medicines?"

Options:

- ✅ Yes → Upload now
- ⏭️ Skip → “I’ll add later”

Step 3: Add Reports Anytime (Flexible System)

Very important UX:

User can add anytime:

- 📄 Lab reports
- 💊 Medicines
- 🧾 Prescriptions

Medicine Input Methods

✅ **Option A: Manual Entry**

(User fills via guided steps you designed)

Option B: From Prescription Upload

User uploads prescription:

- 📄 Image / PDF
- AI extracts:
    - Medicine name
    - Duration (e.g., 5 days)
    - Timing (morning/night)
    - Dose

Then show editable preview:

Paracetamol
5 days
Morning + Night
1 tablet

User confirms → saved

Daily Tracking (User Side)

Every day user sees:

💊 “Today’s Medicines”

- Morning dose → [ ]
- Night dose → [ ]

User taps:

- ✅ Taken
- ❌ Skip

Smart Reminder System

- Time-based reminder:
    - "Take your medicine now"

Missed Dose Logic (VERY IMPORTANT)

Scenario:

Day 1:

- Morning ❌
- Night ✅

System marks:

- "1 dose missed"

Day 2:

If yesterday missed:

Show:

- ⚠️ "You missed yesterday's morning dose"
- Today's doses still active

Medicine Status System

Each medicine shows:

- 🟢 Ongoing
- ✅ Completed
- ⚠️ Missed doses

Step 3: AI Symptom Tracking Engine

System stores daily logs and tracks:

🔁 **Pattern Detection**

- Same symptom repeating
- Example:
    - Headache → 3 days
    - Acidity → 4 days

Step 3: Smart Warning System

This is your **core feature**

Rule Example:

- Symptom > 3 days → Warning
- Severe symptom → Immediate alert

Example Alerts:

- ⚠️ "Stomach pain for 4 days → Consider medical test or doctor consultation"
- 🚨 "Fever for 3 days → Doctor consultation recommended"

USER OUTPUT SYSTEM (What user sees)

DAILY OUTPUT (Main Screen – Most Important)

🏠 "Today's Health Dashboard"

🟢 A. Daily Check-in (Top Section)

- "How are you today?"
    - ✅ All good
    - ❗ Add symptoms

B. Today's Medicines

- List of medicines
- Mark:
    - ✅ Taken
    - ❌ Missed

👉 **Show reminder:**

- **“You have 1 dose pending”**

C. Food & Lifestyle Tracker

- What you ate today
- Junk food indicator ⚠️
- Water intake 💧
- Sleep status 😴

E. Quick Insights (Mini AI Output)

Example:

“No symptoms today — good job ✅”

“ if symtoms persist give Alerts:

⚠️ “Stomach pain for 4 days → Consider medical test or doctor consultation”

🚨 “Fever for 3 days → Doctor consultation recommended”

- **“Low water intake today ⚠️”**
- **“Junk food detected — avoid tomorrow”**

⭐ **Weekly Health Report (Final UI Design)**

1. Header Section

Weekly Health Report
Mar 18 – Mar 24

👋 Hi Sakshi,
Here’s your health summary

⭐ **2. Issues Detected Section**

Issues Detected

• Mild Acidity (3 days)

• Diabetes

👉 If nothing:

✅ No issues detected this week

3) Lifestyle Summary

• Junk food:

WHAT TO SHOW (3 LEVELS)

🟢 1. Weekly Summary (Top)

🍟 Junk Food This Week

Total: 3 times
Status: Moderate ⚠️

• Sleep avg: 7 hrs 😴
• Activity: Moderate 🚶

4) Report Summary (Lab Reports)

📊 Medical Reports

🩸 Blood Test
• Hemoglobin: 10.2 🔴 Low
• Sugar: 95 🟢 Normal

🧪 Vitamin D
• 18 🔴 Deficient

[View Full Reports 📄]
---

6) Medicine Tracking

💊 Medicine Compliance

• Paracetamol → 90% followed
• 1 dose missed ⚠️

7) Weekly Trends (Visual Section – Final Design)

🎯 Purpose

- Show progress over weeks
- Help user understand:
  - Am I improving?
  - What is getting worse?

📊 WHAT TO SHOW IN WEEKLY TRENDS

You should include 3–4 key comparisons

⭐ 1. Health Score Trend (MOST IMPORTANT)

Week 1 → 65
Week 2 → 72
Week 3 → 82 ⬆️

👉 In UI:

- Line graph 📈
- Green if improving
- Red if declining

2. Symptoms Trend

Week 1 → 5 days symptoms
Week 2 → 3 days
Week 3 → 1 day ⬇️

👉 Shows:

- Improvement in health

🍟 3. Junk Food / Lifestyle Trend

Week 1 → 4 times
Week 2 → 3 times
Week 3 → 2 times ⬇️

👉 Helps user link behavior → health

4) Medical Parameter Trend (Advanced Feature)

If reports available:

Hemoglobin:
Week 1 → 9.8
Week 2 → 10.2 ⬆️

Vitamin D:
Week 1 → 15
Week 3 → 18 ⬆️

👉 This is very powerful for:

- Chronic patients
- Doctor insights

8) Action Section (MOST IMPORTANT)

👉 This is where app becomes useful

📋 Recommended Actions

• Continue current diet
• Take Vitamin D supplements
• Avoid oily food

[👨‍⚕️ Consult Doctor]

Step 5: Doctor Dashboard View

Doctor can see:

📊 **Complete Timeline**

- Daily symptoms history
- Food habits
- Junk food frequency
- Sleep/activity
- Medicines taken

This is VERY powerful because:

Doctors usually don’t get real lifestyle data
